

BLESSING METAL INDIA
PRECISION BRASS &
METAL COMPONENTS

A globally recognized manufacturer and exporter specializing in high-quality brass, bronze, and copper components with advanced CNC technology, delivering excellence from Jamnagar, Gujarat.

 Company Profile

Founded on the principles of precision and quality, **Blessing Metal India** has grown into a premier manufacturer of non-ferrous metal components. We operate from a state-of-the-art facility serving a diverse global clientele across multiple critical sectors.

 Our Mission

To deliver unparalleled engineering solutions through continuous innovation, rigorous quality control, and a customer-first approach.

 Infrastructure

Our expansive manufacturing plant is equipped with the latest technology, enabling us to handle high-volume bulk orders without compromising on precision and strict deadlines.

- Automated Multi-Axis CNC Turning Centers
- High-Speed VMC (Vertical Machining Centers)
- Custom Forging & Stamping Presses
- Automated Threading & Tapping Machines
- Sliding Head Automats

GLOBAL ACCREDITATIONS

Core Manufacturing Capabilities

We leverage decades of engineering expertise and cutting-edge machinery to produce highly complex metal components with exceptional repeatability.

Precision CNC Machining

High-tolerance turning, milling, and multi-axis CNC operations for complex component geometries and superior surface finishes.

Hot Forging & Stamping

Robust hot forged components ensuring exceptional mechanical strength, material density, and near-net shape accuracy.

Turn-Mill Operations

Advanced sliding head automats and turn-mill centers for high-volume, high-precision production of intricate parts.

Surface Finishing

In-house specialized coatings including Nickel, Chrome, Tin, and Silver plating available to meet environmental and aesthetic needs.

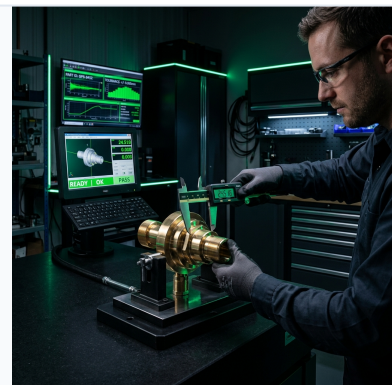

Quality Assurance & Testing

Quality is embedded in our DNA. We maintain a zero-defect policy backed by an advanced in-house testing laboratory and stringent inspection protocols at every manufacturing stage.

Inspection Protocols

- Raw Material Spectral Analysis
- First Article Inspection (FAI)
- In-Process Hourly Checks
- Pre-Dispatch Final Audits
- 100% Traceability & Documentation

Coordinate Measuring Machine (CMM)

Vision Measurement Systems (VMS)

Optical Emission Spectrometer (OES)

Surface Roughness Testers

Premium Alloys

We work with a wide range of international material grades (IS, BS, DIN, ASTM) to meet exact specifications.

Free-Cutting Brass

IS 319 / CZ121 / CuZn39Pb3 - Ideal for high-speed precision machining.

Industries Served

We partner with global leaders across various critical sectors to supply high-performance components:

-  Automotive & Aerospace
-  Electrical & Electronics
-  Plumbing, Sanitary & HVAC
-  Telecommunications
-  Pneumatics & Hydraulics
-  Oil & Gas
